Masix Smart Park

About **MASIX SMART PARK**

Masix Smart Park is a dynamic business unit under the umbrella of Masix Smart Automation Pvt. Ltd., specializing in the design, manufacturing knowledge, and supply of advanced automation systems for residential and commercial spaces.

As a leading provider in the smart automation industry, Masix Smart park offers a wide range of cutting-edge solutions that enhance convenience, security, and energy efficiency.

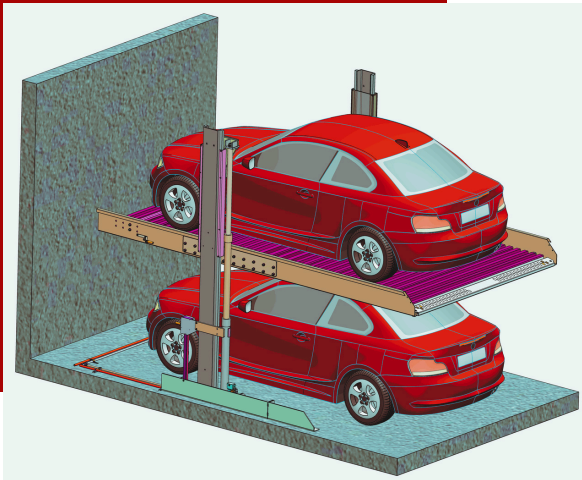

With urban populations expanding and living spaces becoming more constrained, Masix Innovations continuously develops customized automation solutions to meet the evolving needs of modern living.

The Road Ahead

- To design and deliver innovative parking solutions that make urban mobility easier, safer, and more sustainable.
- To provide high-quality parking products and services that exceed customer expectations and enhance the parking experience.
- To simplify parking and empower drivers to move freely and efficiently through smart technology and user-centric design.

“ The ever growing need for parking convenience for a generation that's running out of patience looking for a space, therefore enforces the need of smart parking solutions. That where we step in! ”

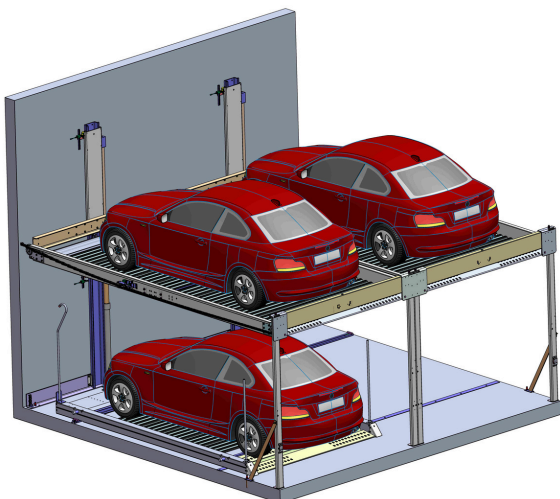

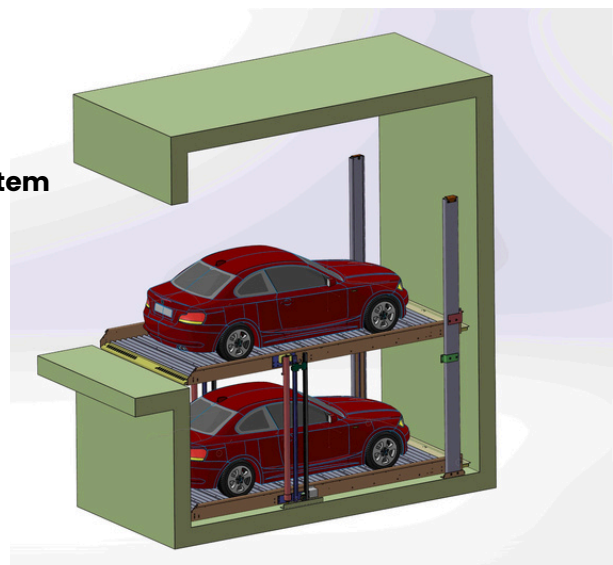

SPS_2x1 **Stack Parking System**

- 01 driving level = 02 parking level = cost saving

- Weight capacity up to 2600 Kg / platform
- Low maintenance cost
- Operational & Exclusive safety
- For office building, residential, mall, hospitals and government premises.

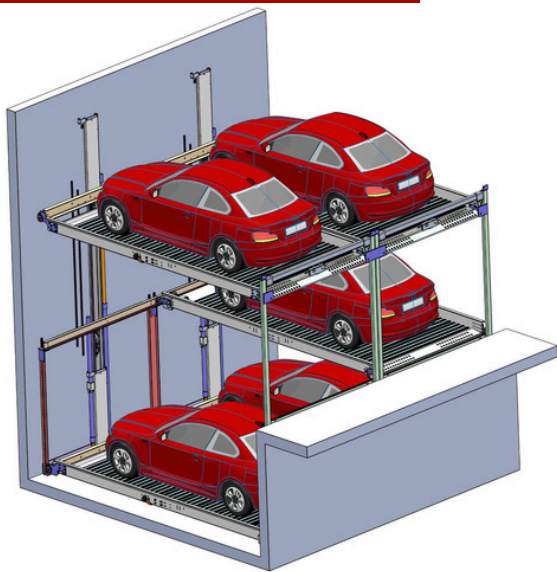

SPS Pit_2x1 **Stack Pit Parking System**

- 01 Driving level = 02 Parking level = cost saving
- Exclusive independent parking
- Weight capacity up to 26000 Kg / platform
- Each platform moves up-down simultaneously.
- Low maintenance cost
- Operational & Exclusive human safety
- Ideal for office buildings, mall, hospitals, residential and government premises.

SPS_2xN **Standard Puzzle System**

- Exclusive independent parking having 02 levels above each other.
- Weight capacity up to 2600 Kg /platform
- Platform operates independently and grids can be increased from 02 to 12.
- Low maintenance cost
- Operational & Exclusive human safety
- Ideal for office buildings, mall, hospitals, residential and government premises.

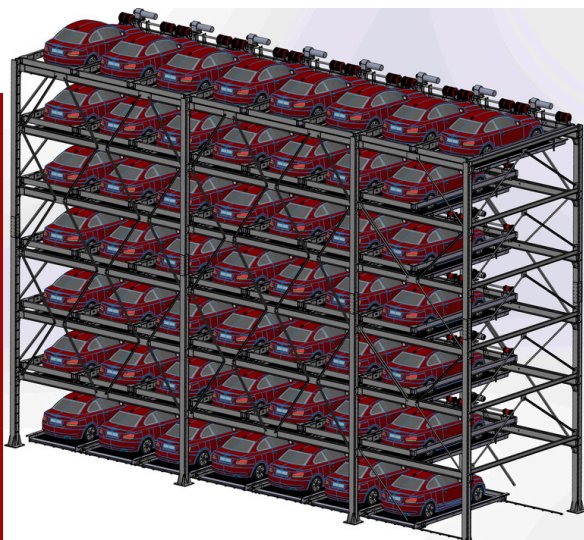

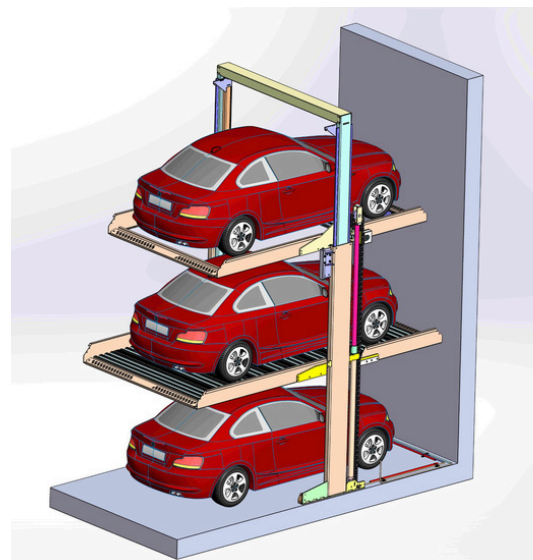

PPS_3XN **Pit Puzzle Parking System**

- Exclusive independent parking having 03 levels above each other with pit level.
- Weight capacity up to 2600 Kg / platform
- Platform operates independently and grids can be increased from 02 to 12.
- Low maintenance cost
- Operational & Exclusive safety
- Ideal for office buildings, mall, hospitals, residential and government premises.
- As an option, platform width can be increased at additional charge.

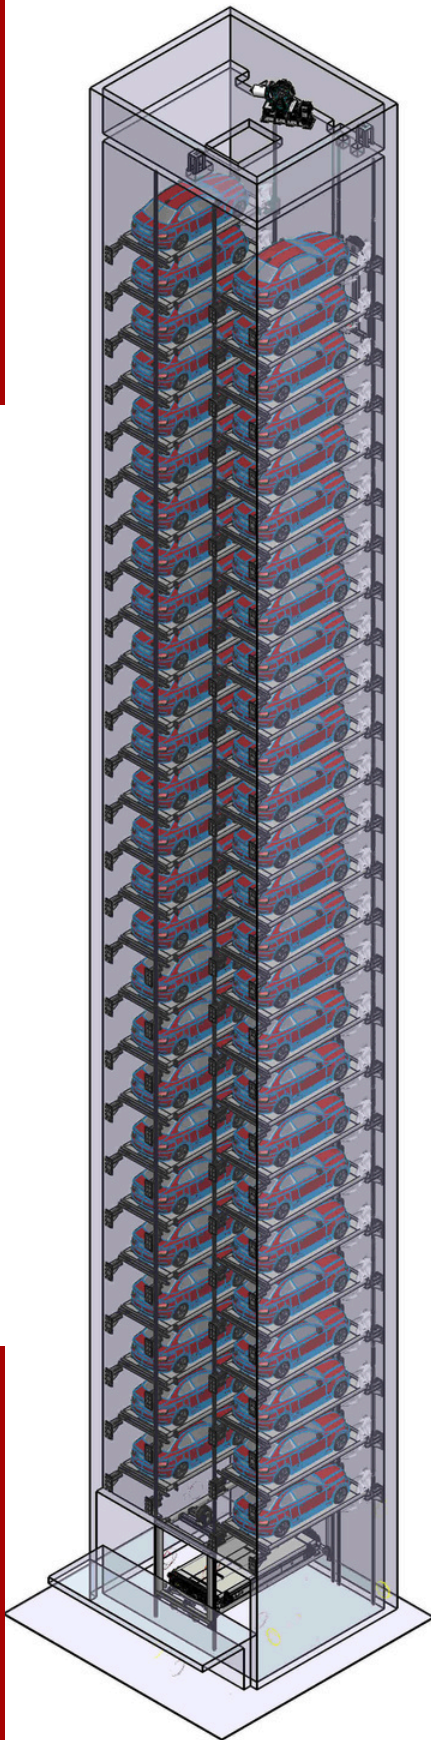

SPS_3x1 **Stack Parking System**

- 01 Driving level = 03 Parking level = cost saving
- Dependent parking / valet parking
- Low maintenance, construction cost
- Weight capacity up to 26000 Kg / platform
- Operational & Exclusive safety
- Ideal for office buildings, mall, hospitals, residential and government premises.

PPS_6_8G **Puzzle Parking System**

- Very small space for multiple cars
- Multiple row arrangements.
- No ramps and driving lens required, safe for user and cars
- Customize design
- Max Configuration with 07 Levels & 09 Grids
- Weight capacity up to 2500 Kg/ Platform

TPS_2x1 Tower Parking System

- Very small space for multiple cars
- Multiple row arrangements next to vertical lift
- No ramps & driving lens required, safe for user & cars
- Customise design
- Turntable integration customizable
- Weight capacity up to 2500 kg/ platform.
- Can be design in Civil shaft or in Metal Structure.
- Max configuration with 70 m height
- Max row with 6 Grid excluding lift.
